

BREAKOUT MODE

FACT SHEET

Give participants the freedom to answer questions in any location, at their own pace.

An alternative approach to conventional live voting, Breakout Mode provides greater flexibility by allowing your audience to answer questions from multiple locations.

Participants are able to vote independently and at their own pace.

Using the scrolling keys on their Communicator keypad, participants select the question they want to answer and then enter their response.

Questions can be answered in any order and participants can change their responses at any time.

FLEXIBLE

Breakout Mode can be used in multiple locations and there is no restriction on when responses can be given.

ADDED VALUE

Combining independent Breakout Mode voting with live group voting will ensure your audience remains engaged and involved throughout your event.

INDEPENDENT

Participants are able to vote independently, at their own pace. This is ideal for surveying large groups of people who cannot arrive and leave at the same time.

MULTIPLE LANGUAGES

Ideal for an international audience, Breakout Mode allows you to ask questions in multiple languages, ensuring complete understanding and accessibility.

DOWNLOAD RESULTS

Answers are saved in the memory of the Communicator keypad and can be downloaded at a time convenient to you. Results can be displayed live to your audience or used for post-event analysis.

INSTANT SCORING

Downloaded responses can be scored instantly by the system, providing you with immediate individual quiz and test results.
